

***Firefly Wireless Gunshot Detector***

***Automatic Building Lockdown***

***Emergency Mass Notification System***

***Mass "text" to all First Responders  
of assailant's position, location,  
description, and weapon caliber***

***DoE designed for ZERO false read-rate***

***Aerial photo of building layout  
including location of the Assailant(s)***

***Allows First Responders immediate  
access to real-time critical information  
on their personal, hand-held devices***

***Live Video Streaming to real-time  
crime centers***

# FireFly<sup>®</sup> Wireless Ballistic Sensor

**Gunshot Detection Technology developed by  
the Department of Energy**

**Algorithm analyzes Energy and Waveform to  
prevent false alarms**

**Wireless detection Range  
~300ft indoor/~500ft outdoor**

**Ballistic Detection Range  
~100ft - 120ft indoor, ~100ft outdoor**

**433 MHz wireless frequency**

**3.6V Battery with ~4 year life**

**POE/USB Receiver with 200 node connections**

**Requires only one node per coverage area**

**Weatherproof IP67 case**
